

# Canadian Red Cross Major Account Solutions

## Customized Occupational Health and Safety (OH&S) Solutions for Every Employee, at Every Location

The realities of today's workplace make it difficult to dedicate the time and resources needed to coordinate and execute a comprehensive, standardized OH&S training program – especially when you have to train employees in multiple locations.

The Canadian Red Cross Major Account Solutions (MAS) program makes it easier to ensure consistent, flexible training for all your employees, and can assist you in supporting a strong health- and safety-oriented workplace culture. Our comprehensive menu of training includes first aid, CPR, Psychological First Aid and OH&S courses.

### We know that regulatory compliance is important to you.

- We are proud to offer learner-centred, evidence-based first aid training that empowers people with lifesaving skills while helping workplaces comply with health and safety legislation.
- Our First Aid & CPR courses meet the standards for all provincial and territorial worker safety and insurance boards\*, and our program is suitable for federal employees as well.

### We offer tailored solutions, and the experience to make a difference.

- Our Major Account Solutions program supports training to over 50 large-scale clients across Canada in a variety of industries.
- Our team will work with you to offer customized solutions to meet your needs.
- We offer flexible delivery formats including online and blended approaches to learning.

\*In Quebec, not all Red Cross course levels are approved but MAS can connect you with our Training Partners who offer the Quebec government's workplace first aid program.
